Guidelines to invigilators during examination

1. All Invigilators requested to wear face mask and hand gloves compulsorily throughout the session.
2. Ask the students to keep their books, note books, mobile phones and their written materials outside the examination hall. Enter correct seat numbers; use only black ink for writing.
3. Check whether the students have occupied their seats as per the seating arrangement.
4. Distribute answer books to the students at least 10 minutes before the start of the examination and ask them to fill in correct details on the front page of the answer books
5. Kindly instruct the students to read the instructions given in the answer booklet.
6. Check the Hall ticket and identity cards of the students and sign on their answer books, if all details are correct.
7. Question papers will be made available by the CS/External/Internal DSC in each examination hall before 10 minutes of the examination time schedule.
8. Take the signature of students on the B-Form, mark "AB" for absent students and maintain the attendance record of his/her in examination hall,
9. If mentioned in the question paper then distribute the graph papers/Data hand books/smith chart etc. to the students as and when demanded by the students and maintain the record of supplements issued in the given B-Form,
10. Maintain general discipline in the classroom by frequently moving in the examination hall and preventing any malpractices or attempt of copying by students.
11. Report cases of misbehaviour, indiscipline, malpractices and copying cases of students to the CS/Internal DCS/External DCS for further necessary action
12. Give warning to the students to tie their supplements, 10 minutes before the end of examination,
13. Collect the answer books from the students at the end of examination and arrange them sequentially as per the examination seat numbers of students for each course separately,
14. Hand over the answer books and filled B form to CS/DCS(Internal or External)

SYSTEM SOFTWARE LABORATORY (Effective from the academic year 2018 -2019) SEMESTER – VI			
Course Code	**18CSL66**	**CIE Marks**	40
Number of Contact Hours/Week	0:2:2	**SEE Marks**	60
Total Number of Lab Contact Hours	36	**Exam Hours**	03
Credits – 2			

Course Learning Objectives: This course (18CSL66) will enable students to:

- To make students familiar with Lexical Analysis and Syntax Analysis phases of Compiler Design and implement programs on these phases using LEX & YACC tools and/or C/C++/Java
- To enable students to learn different types of CPU scheduling algorithms used in operating system.
- To make students able to implement memory management - page replacement and deadlock handling algorithms

Descriptions (if any):

Exercises to be prepared with minimum three files (Where ever necessary):

1. Header file.
2. Implementation file.
3. Application file where main function will be present.

The idea behind using three files is to differentiate between the developer and user sides. In the developer side, all the three files could be made visible. For the user side only header file and application files could be made visible, which means that the object code of the implementation file could be given to the user along with the interface given in the header file, hiding the source file, if required. Avoid I/O operations (printf/scanf) and use ***data input file*** where ever it is possible.

Programs List:

Installation procedure of the required software must be demonstrated, carried out in groups and documented in the journal.

1.	
a.	Write a LEX program to recognize valid ***arithmetic expression.*** Identifiers in the expression could be only integers and operators could be + and *. Count the identifiers & operators present and print them separately.
b.	Write YACC program to evaluate ***arithmetic expression*** involving operators: +, -, *, and /
2.	Develop, Implement and Execute a program using YACC tool to recognize all strings ending with ***b*** preceded by ***n a's*** using the grammar $a^n b$ (note: input ***n*** value)
3.	Design, develop and implement YACC/C program to construct ***Predictive / LL(1) Parsing Table*** for the grammar rules: $A \rightarrow aBa$, $B \rightarrow bB \mid \varepsilon$. Use this table to parse the sentence: ***abba$***
4.	Design, develop and implement YACC/C program to demonstrate ***Shift Reduce Parsing*** technique for the grammar rules: $E \rightarrow E+T \mid T$, $T \rightarrow T*F \mid F$, $F \rightarrow (E) \mid id$ and parse the sentence: $id + id * id$.
5.	Design, develop and implement a C/Java program to generate the machine code using ***Triples*** for the statement $A = -B * (C + D)$ whose intermediate code in three-address form: $T1 = -B$ $T2 = C + D$ $T3 = T1 + T2$ $A = T3$

Subject code:18CV72 **Third Continuous Internal Evaluation (CIE-III)** **Time: 02.30 – 03.30PM**

Course coordinator: Mr.Prasad K N Course name: **DESIGN OF RCC AND STEEL STRUCTURES**

COURSE OUTCOMES: **(IS:456-2000,IS:800-2007,steel table are allowed)**

CO-2: Students will have the ability to follow design procedures as per codal provisions and skills to arrive at structurally safe RC and Steel members.

Revised Bloom's Taxonomy Levels: L1–Remembering, L2–Understanding, L3–Applying, L4–Analyzing, L5–Evaluating, and L6–Creating.
